

Join Laava Tech as

## Biological / Horticultural Engineer

and help us make vertical farming sustainable. Laava Tech is an Estonian start-up with a technology to change indoor farming, a 100+ bn € industry. We develop energy-saving technology to help vertical farms eliminate their biggest pain point - electricity consumption.

---

### WE ARE LOOKING FOR SOMEONE WITH:

- An interest in agricultural/horticultural technologies, photosynthesis, light and matter.
- Exceptional knowledge in biology and chemistry, especially plant physiology, in-cell processes, and environmental interaction.
- Extensive experience in the lab set-up and management.
- Strong scientific approach to research and experiments incl. process documentation and data analytics.

In addition, scripting and data visualisation skills are a big plus! We are on the hunt for someone with a wealth of ideas and enthusiasm to try new things, to experiment, and have the readiness to come out of the lab to combine research and practice. You enjoy thoughtful conversations about problems and perfect designs, but in the end, you know that what matters is delivering a manufacturable solution that works every time.

What will really get you noticed is excellent communication skills, adaptability (you're applying to a start-up, after all), and a positive outlook.

### WE CAN OFFER YOU:

- **Competitive compensation** - the range depends on your experience and your suitability to the role.
- **Flexible working hours & location**
- A flat structure with **a lot of independence to make the decisions** on how to best achieve your goals.
- An opportunity to get on board with a high-potential start-up at an early stage.
- **A cool office in Tallinn**, Estonia, and modern working tools.

### HOW TO APPLY?

To start the discussion, send your CV and application (including your salary expectation) to [info@laavatech.com](mailto:info@laavatech.com) and we'll be in touch.

If you have any questions, please don't hesitate to email us at [info@laavatech.com](mailto:info@laavatech.com).
